

Basic Notification by Norway

Notification concerning the Price Compensation System Applied under Protocol No. 2 of the Free Trade Agreement

In accordance with paragraph 1(e) of article 21 of the Convention, Norway submits this notification containing the following annexes.

Annex I Introductory Description of the Price Compensation System in Norway

Annex II Goods covered by the Price Compensation System: Import Regime

Annex III Goods covered by the Price Compensation System: Export Regime

Annex IV List of Raw Materials covered by the Price Compensation System: Import Regime

Annex V List of Raw Materials covered by the Price Compensation System: Export Regime

Annex VI Matrix Codes Table

Annex VII List of additional Raw Material Codes

Annex VIII List of Standard Recipes used in the Calculation of the Agricultural Element

Annex IX Raw Materials in the Matrix

Annex X List of additional Raw Materials

Annex XI List of Conversion Rates

Annex XII Internal Measures

Annex XIII Legal Regulations concerning the Price Compensation System and Information on Administrative Authorities

Published May, 1997

Introductory Description of the Norwegian Price Compensation System

1 Introduction

Norway has adopted a regulation covering the trade in industrial processed agricultural goods according to the agreement within EFTA and the free trade agreement between Norway and EU.

The price compensation measures are introduced in regard to the effect the agricultural policy has on the raw materials costs of the food industry, and to avoid disturbances in trade with processed goods.

The Norwegian Price Compensation System is based on customs duties, export restitutions, and internal measures.

The agricultural element of the custom duties is expressed as a specific duty calculated either on the basis of standard recipes, matrix or on the basis of the actual content of raw materials, or in some cases as an ad valorem duty.

This notification is only describing the agricultural component of the consolidated WTO tariffs, according to the commitments expressed in the Protocol no. 2 of the free trade agreement between Norway and the EU.

2 Import regime

2.1. Goods coverage

The Norwegian price compensation is applied to some goods of Chapters 4, 7, 15, 17, 18, 19, 20, 21, 22 and 35 in the HS nomenclature.

2.2. Selection of raw materials

According to the Norwegian price compensation regulations, the following raw materials can be taken into account for the calculation of customs duties:

- milk and milk products
- egg and egg products
- potatoes and potato products
- cereals and flour
- starch
- meat
- sugar and glucose
- fruits
- oils and vegetable fats

2.3. Calculation

The agricultural element of the duty is set as a specific amount or in some cases as an ad valorem rate.

For goods where the agricultural element is calculated as a specific amount, the duty is based on standard recipes or on content of raw materials according to a matrix and some additional raw materials. For these goods the calculation of the specific amounts is based on compensatory amounts and the content of the raw materials concerned. For some goods, the agricultural element is calculated on the basis of the actual content of raw materials.

For goods subject to duties calculated as standard recipes, the duties are fixed per tariff line in the Norwegian Customs Tariff.

If the goods are subject to an agricultural element calculated on the basis of content of raw materials, a declaration formula on the actual content of the raw material content has to be transmitted to Statens Kornforretning. If the duty is calculated on the basis of the matrix, the formula is then computerized and the real content is transformed according to specific coefficients, to the raw materials in the matrix and the additional raw materials. The importer then receives a written communication stating the duty according to the agricultural element and the matrix-code and code for additional duty.

2.4. Price differences

The price differences applied when calculating duties on the basis of matrix, standard recipes or the actual content of raw-materials, are the same as in the «agreed minutes» annexed to the exchange of letters of 19th December 1996 between the Council of the European Communities and the Government of the Kingdom of Norway.

3 Export regime

3.1. Goods coverage

Products eligible for export restitutions are listed in annex III.

3.2. Selection of Raw Materials

Export restitution is paid for the same coverage as for import regime, with the exception of caseinates, milk albumin, berries and berry concentrates, eggs and egg products, wheat and wheat flour, rye and rye flour, sugar, oils and vegetable fats.

3.3. Calculation of the Export Refunds

The export restitutions are calculated on the quantities of raw materials utilized in the manufacture of agricultural goods. The exporter has to declare the actual raw material content to Statens Kornforretning, and receives compensation according to a declaration formula.

The compensation amounts are fixed every third month.

Export refunds are given within the limits set by the WTO-agreement.

4 Internal measures

Internal price reduction measures are still used, but at reduced amounts per kilogramme.

**Goods covered by the Norwegian Price Compensation System;
Import Regime**

MX = Matrix calculation of agricultural raw material
and additional duties for some raw materials

D = Duty calculation on the basis of the actual contents of raw materials

SR = Duty calculation on the basis of standard recipes

AD = Ad valorem duties

FR = Fixed rate

Raw materials covered by the Price Compensation System: Import

Raw Materials in Standard Recipes

Milk for yogurt
Milk for beverages
Whole milk powder (28%)
Skimmed milk powder
Butter
Cheese
Whole egg paste (=Whole egg, not in shell)
Whole egg powder
Preserved egg yolks (= Egg yolks, liquid)
Wheat flour
Durum flour
Rye flour
Flour and flakes of potatoes
Potato starch
Glucose
Strawberries
Pork meat 23%
Bovine meat 14%

Raw Materials in the Matrix and additional Raw Materials

Whole milk powder (28%)
Skimmed milk powder
Butter
Starch
Wheat flour
Bovine meat 14%
Cheese
Whole egg powder
Raspberries

Raw Materials used in the Calculation for the Agricultural Element on the Basis of the actual Content of Raw Materials.

Whole milk, liquid	Rye
Skimmed milk, liquid	Rye-wheat
Milk for yogurt	Wheat bran
Milk for beverages	Oats bran
Condensed milk	Wheat flour
Condensed milk, skimmed	Durum flour
Whole milk powder	Barley flour
Milk powder 20% fat	Rolled oats
Skimmed milk powder	Rye flour
Butter milk powder	Rye wheat flour
Cream	Potatoes
Cream mixture	Flour and flakes of potatoes
Heavy sour cream	Potato starch
Cream powder	Other starch
Whey powder	Modified starch
Caseinates	Glucose and glucose sirup (17023000 and 17024000)
Milkalbumin	Black currants
Butter	Black currants concentrate
Cheese	Raspberry
Cheese powder	Raspberry concentrate
Eggs in shell	Strawberry
Whole egg paste (= Whole egg, not in shell)	Strawberry concentrate
Whole egg powder	Pork meat
Preserved egg yolks (= Egg yolks, liquid)	Bovine meat
Egg yolk powder	Sheep meat
Common wheat	Poultry meat
Durum wheat	
Barley	
Oats	

**List of Raw Materials in System:
Export Regime**

Whole milk, liquid
Skimmed milk, liquid
Milk for beverages
Condensed milk
Condensed milk, skimmed
Whole milk powder
Milk powder 20% fat
Skimmed milk powder
Butter milk powder
Cream
Cream mixture
Heavy sour cream
Cream powder
Whey powder
Butter
Cheese
Cheese powder
Eggs in shell
Whole egg paste (= Whole egg, not hi shell)
Whole egg powder
Preserved egg yolks (= Egg yolks, liquid)
Egg yolk powder
Barley
Oats
Rye-wheat
Wheat bran
Oats bran
Durum flour
Barley flour
Rolled oats
Rye wheat flour
Potatoes
Flour and flakes of potatoes
Potato starch
Glucose
Pork meat
Bovine meat
Sheep meat
Poultry meat

Norwegian matrix Codes

For the goods in the matrix, there will also be additional duties for the raw materials meat, egg, fruits of berries and cheese

Egg raw materials: Egg yolk conserved (= Egg yolk liquid), Egg yolk powder

Potato raw materials: Potato, Meal and flakes of potatoes, Potato starch, Glucose

Meat raw materials: Pork, Bovine, Sheep, Poultry

Only ice cream mixtures under tariff heading 19.01 and ice cream under tariff heading 21.5 are eligible for price reductions for butter.

Only pizzas under tariff position 19.05 are eligible for price reductions for cheese.

Legal Basic Regulations concerning Price Compensation System and Information on Administrative Authorities

Legal Regulations

Price Compensation Act was adopted in 1974, and amended by Royal Decree in December, 1985. (Lov om importavgift og råvareprisutjevning ved eksport for produkter fremstilt ved bearbeidelse av jordbruksvarer, 31. mai 1974 nr. 20, kg. res. av 20. desember 1985).

Duty reductions are given according to preliminary provisions of the Norwegian Custom Tariff §5.

Not available in any other language than Norwegian.

Regulation concerning the implementation of price compensation measures: «Forskrifter for gjennomfering av råvareprisutjevning for industrielt bearbeidede jordbruksvarer» last amended 5. July, 1995.

Not available in any other language than Norwegian.

Administrative Authorities

The Ministry of Agriculture is responsible for the general supervision, legislation and policy. The executive unit is Statens Kornforretning, (Norwegian National Grain Administration).

The Ministry's address is P.O.Box 8007 DEP, N-0030 Oslo, telefax 22 34 95 55. Contact person at the Ministry is Hallvard O. Berg.

Statens Kornforretning address is POB 1367 VIKÅ, N-0114 OSLO, telefax 22 93 72 13 or telephone 22 93 72 00. Contact persons are Director John Retzius, and Head of Division Nina Vaage.

Publications

Custom duties, export restitution rates etc. are published by Statens Kornforretning. The Custom duties are also published in the Norwegian Customs Bulletin.
