Annex 6-A

Specific Rules of Origin

Part I – General Interpretative Notes

1. For purposes of interpreting the rules of origin set forth in this Annex:
 - (a) the specific rule, or specific set of rules, that applies to a particular heading or subheading is set out immediately adjacent to the heading or subheading;
 - (b) the requirement of a change in tariff classification applies only to non-originating materials;
 - (c) where a specific rule of origin is defined using the criterion of a change in tariff classification, and it is written to exclude tariff provisions at the level of a chapter, heading or subheading of the Harmonized System, it shall be construed to mean that the rule of origin requires that materials classified in those excluded provisions be originating for the good to qualify as originating;
 - (d) when a heading or subheading is subject to alternative specific rules of origin, the rule will be considered to be met if a good satisfies one of the alternatives;
 - (e) when a single rule of origin is applicable to a group of **headings** or **subheadings** and that rule of origin specifies a change of **heading** or **subheading**, it shall be understood that the change in **heading** or **subheading** may occur from any other **heading** or **subheading**, as the case may be, including from any other **heading** or **subheading** within a designated group. When, however, a rule refers to a change in **heading or subheading** “outside that group” this shall be understood to require that the change in **heading or subheading** must occur from a **heading or subheading** that is outside the group of **headings** or **subheadings** set out in the rule;
 - (f) reference to weight in the rules for goods provided for in Chapter 1 through 24 of the Harmonized System means dry weight unless otherwise specified in the Harmonized System; and
 - (g) for Chapters 1 to 40, a good shall not be considered to be originating solely by reason of mere dilution with water or another substance that does not materially alter the characteristics of the good.
2. The following definitions apply:

Mineral Fuels, Mineral Oils and Products of their Distillation; Bituminous Substances; Mineral Waxes

Note:

For purposes of this chapter, a “chemical reaction” is a process (including a biochemical process) that results in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.

The following are not considered to be chemical reactions for the purposes of this definition:

- (a) dissolving in water or other solvents;
- (b) the elimination of solvents, including solvent water; or
- (c) the addition or elimination of water of crystallization.

For purposes of heading 27.10, the following processes confer origin:

- (a) Atmospheric distillation: A separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapor then condensed into different liquefied fractions.
- (b) Vacuum distillation: Distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation.
