

## **Annex 3.02**

### **Specific Rules of Origin**

#### **Part A – General Interpretative Notes**

1. For the purposes of interpreting the rules of origin set out in this Annex:
  - (a) the specific rule, or specific set of rules applicable to a particular heading, subheading or group of headings or subheadings is set out immediately adjacent to that heading, subheading or group of headings or subheadings;
  - (b) a requirement of a change in tariff classification or any other condition set out in a specific rule applies only to non-originating materials;
  - (c) reference to weight in the rules for goods provided for in Chapters 1 through 24 of the Harmonized System means dry weight unless otherwise specified in the Harmonized System;
  - (d) the expression “a change from any other heading” or “a change from any other subheading” means a change from any other heading (or subheading) of the Harmonized System, including, where applicable, any other heading (or subheading) within the group of headings (or subheadings) to which the rule applies;
  - (e) the expression “a change from any heading outside that group” or “a change from any subheading outside that group” means a change from any other heading (or subheading) of the Harmonized System, except from any other heading (or subheading) within the group of headings (or subheadings) to which the rule applies;

(f) the expression:

- “a change from within that heading”,
- “a change from within that subheading”,
- “a change from within any one of these headings”,
- “a change from within any one of these subheadings”,
- “a change to (a good) of (a tariff provision) from within that (tariff provision)”, or
- “a change to (a good) of any one of (tariff provisions) from within that (tariff provision)”,

means a change from any other good or material of that same heading (or subheading) of the Harmonized System;

(g) where two or more rules are applicable to a heading, subheading or group of headings or subheadings and the alternative rule contains a phrase commencing with the words “whether or not”,

(i) the change in tariff classification specified in the phrase commencing with the words “whether or not” reflects the change specified in the first rule applicable to the heading, subheading or group of headings or subheadings,

(ii) the only change in tariff classification permitted by the alternative rule, in addition to the change in tariff classification specified at the beginning of that rule, is the change specified in the phrase commencing with the words “whether or not”,

(iii) unless otherwise specified, only the value of the non-originating materials referred to at the beginning of the alternative rule, and specified again in the phrase commencing with the words “provided that the value of the non-originating materials”, shall be included in calculating the value of non-originating materials, and

(iv) the value of any non-originating materials satisfying the change of tariff classification specified in the phrase commencing with the words “whether or not” shall not be included in calculating the value of non-originating materials; and

(h) the following definitions apply:

(i) **chapter** means a chapter of the Harmonized System,

(ii) **heading** means any 4-digit number, or the first 4 digits of any number, used in the nomenclature of the Harmonized System,

(iii) **section** means a section of the Harmonized System, and

(iv) **subheading** means any 6-digit number, or the first 6 digits of any number, used in the nomenclature of the Harmonized System.

2. A product-specific rule of origin set out in this Annex establishes the minimum amount of production required to be carried out on non-originating materials for the resulting good to achieve originating status. A greater amount of production than that required by the rule for that good will also confer originating status.

3. Where a rule of this Annex applicable to a heading, subheading, or group of headings or subheadings contains both a required change in tariff classification and a percentage for the maximum value of non-originating materials, the *de minimis* provision of Article 3.06 permits the use of non-originating materials that do not satisfy the tariff change requirement, as long as the value of such materials does not exceed 10% of the transaction value of the good. However, the value of such non-originating materials shall be included when calculating the value of non-originating materials and the percentage for the maximum value of non-originating materials as set out in the rule may not be exceeded through the use of the *de minimis* provision.

4. Where:

- (a) a rule of this Annex applicable to a good contains both a required change in tariff classification and a percentage for the maximum value of non-originating materials, and
- (b) one or more of the non-originating materials used in the production of the good are classified in the same subheading, or heading that is not further subdivided into subheadings, as the good itself,

Article 3.02(d), which provides that the good shall be considered as originating if the value of the non-originating materials classified as or with the good does not exceed the given percentage of the transaction value of the good, may be applied.

5. Given that, in the case described in paragraph 4, the good resulting from application of Article 3.02(d) qualifies as originating in its own right, the non-originating materials contained therein shall not be taken into account when that good is used in the production of another good. In this particular instance, only the value of any other non-originating materials that are used in the production of the final good and that satisfy the required change in tariff classification set out in the rule of this Annex would have to be taken into account in calculating the value of non-originating materials for the purposes of determining the origin of the final good.

6. The product-specific rules set out in this Annex also apply to used goods.

**Note 1:** *Notwithstanding any of the product-specific rules of origin, any good of Chapter 27 that is a product of a chemical reaction is originating if the chemical reaction occurred in the territory of one or both of the Parties.*

*For the purposes of this Chapter, a “chemical reaction” is a process, including a biochemical process, resulting in a molecule with a new structure by breaking intramolecular bonds and by forming new intramolecular bonds, or by altering the spatial arrangement of atoms in a molecule.*

*The following are not considered to be chemical reactions for the purposes of this definition:*

(a) *dissolution in water or other solvents;*

(b) *the elimination of solvents, including water; or*

(c) *the addition or elimination of water of crystallization.*

**Note 2:**

*For the purposes of heading 27.10, “direct blending” is defined as a refinery process whereby various petroleum streams from processing units and petroleum components from holding or storage tanks combine to create a finished good, with pre-determined parameters, classified under heading 27.10, provided that the non-originating material constitutes no more than 25% by volume of the good.*

**Note 3:**

*For the purposes of heading 27.10, the following processes confer origin:*

(a) *atmospheric distillation – a separation process in which petroleum oils are converted, in a distillation tower, into fractions according to boiling point and the vapour then condensed into different liquefied fractions. Liquefied petroleum gas, naphtha, gasoline, kerosene, diesel or heating oil, light gas oils and lubricating oil are produced from petroleum distillation; and*

(b) *vacuum distillation – distillation at a pressure below atmospheric but not so low that it would be classed as molecular distillation. Vacuum distillation is useful for distilling high-boiling and heat-sensitive materials such as heavy distillates in petroleum oils to produce light to heavy vacuum gas oils and residuum. In some refineries gas oils may be further processed into lubricating oils.*

27.01-27.09	A change from any other heading.
27.10	A change from any other heading;  A change from within that heading, whether or not there is also a change from any other heading, provided that the change is the result of atmospheric distillation or vacuum distillation; or  A change as the result of direct blending, provided that the non-originating material constitutes no more than 25% by volume of the good.
2711.11-2711.14	A change from within any one of these subheadings or any other subheading, provided that the non-originating feedstock constitutes no more than 49% by volume of the good.
2711.19	A change from any other subheading, except from subheading 2711.29.

2713.20	A change from within that subheading or any other subheading, provided that the non-originating feedstock constitutes no more than 49% by volume of the good.
2713.90	A change from any other heading.
27.14-27.16	A change from any other heading.
